**For each assignment, UNISIS comprise of a unique team of highly qualified and experienced inspectors and inspection coordinators so as we can provide a flawless inspection service through out the assignment.**

*Together, we build the excellence....*

# Activity overview

United Specialized Industrial Services (UNISIS), one of the leading organization in Inspection, Expediting, and Specialized Technical services for oil & gas, petrochemical, power, desalination, other infrastructures, production and allied industries.

UNISIS provides customers with highly competent Inspection, Expediting and Specialized Technical services to meet their specific and time bound requirements on a long-term as well as short-term basis. We have highly experienced and qualified Inspectors, Expeditors and project coordinators to ensure the client requirements are taken care on quality and timely manner. Our Human Resources Department is staffed with highly competent team to meet the rising demands from the customers.

# Technical Inspection Services

As the leading provider of independent industrial inspection services, UNISIS is unique in its ability to provide highly professional technical specialists in all over the world to verify both product and process quality.

## **Location**

Whether the activity is at a manufacturer's facility, on-site during construction and assembly or whilst in-service whether an individual assignment, residential assignment, multiple services assignment delivery or a complete project managed services provision, UNISIS is positioned and structured to deliver the highest quality of technical service and ensure that client requirements are met.

UNISIS is committed to delivering the highest quality technical service; assuring technical integrity, and to provide a quality report detailing findings in a timely manner.

The company's technical knowledge of equipment focuses on all aspects of industrial equipment; construction materials, fabricated structures, tanks and static pressure equipment, pipeline and piping systems, process rotating machinery, drilling and production equipment, electrical equipment, instrumentation and control systems.

# Expediting Services

UNISIS provides a proactive and cost effective expediting service through the company's network of experienced field expeditors located close to most major manufacturing centers throughout the Kingdom. UNISIS's expeditors are required to undertake a formal training and examination program and are skilled in production planning and manufacturing processes. Their key focus is to work with the manufacturer to identify delays and potential problems with a view to maintaining schedules and, if required, initiating remedial action to get production activities back on schedule. The client is thus assured of an independent, knowledgeable view of the expected impact on project schedules.

UNISIS's experienced expeditors undertake in-depth trouble-shooting to ensure that required delivery dates are respected and met. This work entails attendance at pre-production meetings, establishment of programs or critical path networks, monitoring of engineering, input sub-orders and sub-vendors, manufacture, test, dispatch, documentation submission/approval and order close out.

The cost control of expediting activity is a key factor to many clients, thus UNISIS provides clients with expediting options along with justifications, with full consideration to minimizing expediting costs on a job against frequency (effectiveness) of expediting and the cost implications of late deliveries.

# Quality Policy

UNISIS is committed to comply with requirement of ISO 9001:2000 and to continually improve the effectiveness of the Quality Management System. It must be clearly understood that this Quality Policy, Quality Manual and associated Operating Procedure and system mandatory on all staff.

The management of UNISIS is fully committed to the Documented Quality Management System to the principle of providing product and services of consistently high quality in safe manner to the complete satisfaction of its clients. The operation of the Quality System is subject to continuous review at the highest management level, to ensure that the established standards are maintained and improved wherever necessary.

UNISIS has introduced systems that will set and review measurable quality objectives. The management actively encourage to personnel to demonstrate their own personnel commitment to Quality and to accept the responsibility for the achievement of the highest standards of workmanship, to enhance the reputation of the company.
